

Project Demo Planning

Date	02 July 2026
Team ID	XXXXXX
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-planned project demonstration helps present the OptiCrop system in a clear and organized manner. The demonstration covers the project overview, problem statement, data analysis, machine learning model, web application, and live crop prediction. Each team member is assigned specific responsibilities to ensure a smooth and effective presentation.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project objectives, agricultural challenges, and problem statement.	2	Team Lead
2	Data Collection & Analysis	Explain the dataset, preprocessing steps, and exploratory data analysis.	3	Data Analysis Team
3	Machine Learning Model	Present model training, evaluation, and crop prediction methodology.	3	Machine Learning Team
4	Live Web Application Demo	Demonstrate the Flask application by entering sample inputs and displaying crop recommendations.	4	Frontend / Backend Team
5	Project Results & Future Enhancements	Demonstrate the Flask application by entering sample inputs and displaying crop recommendations.	2	Team Lead
6	Questions & Answers	Answer questions from evaluators regarding the project implementation.	1	Entire Team

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the agricultural problem and project objectives
2	Solution Overview	Describe the OptiCrop architecture, dataset, preprocessing, and machine learning workflow.
3	Live Feature Demonstration	Demonstrate the web application by providing sample soil and environmental parameters and displaying the recommended crop.
4	Q&A Session	Address evaluator questions and discuss future enhancements of the project.
